RE: New Fluorescent Light Fixtures

Dear Peter,

We are pleased to inform you the energy efficient upgrades you made to our lighting system through out the common areas and inside each apartment unit have been successfully installed and the residents are very pleased with the products.

The installation process was not as problematic as we expected as your installation crew kept our residents' inconveniences to a minimum. And they worked through out the day to finish all the units and outside walls in time.

The products you installed for our residents look absolutely great. The new ceiling fixtures, vanity fixtures and the outdoor fixtures have given our apartment complex a brand new look. These good looking fixtures being free for us is really hard to believe.

If there any other energy saving products or programs that will help us save energy and delight our residents; please don't hesitate to contact us. I look forward to hearing from you soon. And please send our deepest appreciation to everyone at American Power Solutions for their hard work.

Sincerely,

Barbara Martinez,
General Manager
