Fullerton, CA 92833

Dear Peter,

Thank you so much for installing these wonderful light fixtures at our property. It has been more than a month already and I haven't heard one single complaint about the new fixtures. You and your staff definitely deserve applause for all the work you have done for us.

I have checked out inside of one of our resident's apartments to review the new fixtures. The lights seem brighter and cleaner and most of all, the appearance of the fixtures really pleases my eyes. I have to say that our apartments look "upgraded." All of our tenants seem very pleased with the new fixtures as well.

Also, I want to praise the excellent customer service we received from your team. From scheduling the installation to the follow ups we received assured us that you will be there when we need you even after the installation.

Thank you again for your service. In the future, if you have any additional products that will help us save energy or upgrade our apartments, please call me immediately. I look forward to working with you again in the near future.

Sincerely,

Virginia Berrelleze
Resident Manager
