American Power Solutions Inc.
2091 Raymer Ave, Bldg#A
Fullerton, CA 92833

Dear Peter:

Thank you for providing us with these fabulous fluorescent light fixtures. We are very satisfied with the products and the services you and your company provided.

I am delight to see so many satisfied tenants. Their rooms have become brighter and more adoring. My only concern is that I should have installed these energy saving light fixtures long time ago. I should have realized that not all the things that are free are of poor quality either. These fixtures have proven to be good quality products with good looks as well.

We appreciate the cooperation you have shown us scheduling the installation. Our needs and requests were recognized and carried on with every step of the process. Your installers kept our residents' inconvenience to a minimum.

Once again, I want to thank you and everyone at American Power Solutions for the great work.

Sincerely,

Rafael Ortega
Chief Engineer
