RE: New Fluorescent Light Fixtures

Dear Peter,

I want to thank you for installing new fluorescent light fixtures at our property. The appearance and the quality of the light fixtures you installed have pleased our tenants and me.

The installation process was very smooth. They worked non-stop to complete the necessary units before our tenants came back from their work or schools. The inside of our tenants' apartments were kept clean and untouched by the installer who were in there.

The 2 year warranty on all fixtures and 1 year warranty on all lamps are more than what we need to assure us that we do not have to worry about these fixtures breaking down. Also the extended life with these lamps will save the money we spend on the buying new lamps.

Thank you again for your excellent work!! Don't hesitate to give us a call when you come across any programs that can be beneficial to us.

Sincerely,

Raul Caballero
Director of Engineering
